

WOODWORM TREATMENT CONCENTRATE

For professional and amateur use

For the eradication and prevention of attack by wood-boring beetles

- **Full-strength formulation**
(0.2% permethrin when diluted)
- **Solvent-free**
(non-flammable, no VOCs, low-odour)
- **Highly concentrated**
(each pack makes 25 litres)
- **Water-soluble sachets**
(accurate dose control and less waste)
- **Extremely stable once mixed**
(no separation – uniform, even treatment)
- **Targets all lifecycle stages**
(eggs, larvae, and adult beetles)

PRODUCT DESCRIPTION

SoluGuard Woodworm Treatment Concentrate is supplied in Aquapack™ water-soluble sachets that completely dissolve when immersed in water during the mixing and dilution of the product. Exposure to the concentrate is avoided and there are no used plastic bottles to dispose of.

Each pack of SoluGuard Woodworm Treatment Concentrate contains five water-soluble sachets – enough to make 25 litres of woodworm treatment which will treat 75-100m² of timber.

Once diluted, SoluGuard Woodworm Treatment can be applied to timber by brush, coarse spray or dipping.

PRODUCT FORMULATION

The active ingredient in SoluGuard Woodworm Treatment Concentrate is the synthetic pyrethroid insecticide Permethrin, selected for its low mammalian toxicity and proven efficacy against wood boring beetles. Once diluted and ready to use SoluGuard Woodworm Treatment is a full strength (0.2%) formulation – double the strength of many competing products.

SoluGuard Woodworm Treatment utilizes advanced micro-emulsion technology enabling all organic solvent components to be removed. The surfactant system employed is fully biodegradable and contains no alkyl phenol or alkyl phenol ethoxylate components. A significant feature of the advanced micro-emulsion chemistry used is the very high level stability of both the concentrate and diluted material. This ensures an even distribution of active ingredient throughout the ready to use material.

DIRECTIONS:

1. **Dilution:** One 50g sachet of SoluGuard Woodworm Treatment Concentrate is required to make 5 litres of ready to use material. For quantities greater than 5 litres use one sachet for every 5 litres of ready to use material required e.g. use five sachets to make 25 litres.

To make 5 litres insert one unopened sachet into 2 litres of clean water within a suitable 5 litre container and shake. Allow to stand for 2-3 minutes then shake vigorously. Once the sachet has ruptured (water colour will change) introduce the remaining 3 litres of clean water and shake once more. Allow to stand for a further 5 minutes before use to allow sachet to fully dissolve and shake again. Warm water accelerates the dissolving of the sachet.

2. **Application:** Apply by brush or coarse low pressure spray onto timber at a rate of 3 - 4m² per litre or to refusal. Any paint, varnish, dirt or other surface coating should be removed before application. Timber to be treated should be reasonably dry before treatment although the surfactant system will allow penetration into damp timbers.

APPLICATION GUIDANCE

The Control of Substances Hazardous to Health (COSHH) regulations apply to the use of this product at work. Ensure that the operator has read the relevant safety data sheet and is wearing the appropriate safety equipment. Always read the label. For more detailed guidance on the application of SoluGuard Woodworm Treatment visit www.soluguard.com and download the appropriate Application Guidance Document.

COVERAGE

Each pack of SoluGuard Woodworm Treatment Concentrate contains five water-soluble sachets – enough to make 25 litres of woodworm treatment which will treat 75-100m² of timber. As a rough guide, the following table shows the number of packs of SoluGuard Woodworm Treatment required to treat typical domestic properties:

Property	ROOF	FLOORS	WHOLE HOUSE
2 Bed Terrace	15-25 litres (1 pack)	15-25 litres (1 pack)	30-50 litres (2 packs)
3 Bed Terrace	40-50 litres (2 packs)	40-50 litres (2 packs)	80-100 litres (4 packs)
3 Bed Detached	50-65 litres (2 - 3 packs)	50-60 litres (2 - 3 packs)	100-125 litres (4 - 6 packs)
4 Bed Detached	75-90 litres (3 - 4 packs)	70-80 litres (3 - 4 packs)	145-170 litres (6 - 8 packs)

The above figures should only be taken as a rough guide.

PACKAGING

Cardboard boxes containing 5 x 50g sachets.

STORAGE / HEALTH AND SAFETY

Store above 5°C in dry conditions in original closed box. Store in a safe place, keep out of reach of children. Keep away from food, drink and animal feedstuffs. For full health and safety information consult safety data sheet. This product is approved for use under the Control of Pesticides Regulations (1986) for use as directed. HSE No.8152.

Use pesticides safely. Always read the label.
