Technicians/Foundation Training Course

Course Tutor: G.R.Coleman. B.Sc.(Hons).,M.I.Biol.,C.Biol.,A.I.W.Sc.F.Inst.R.T.S.

R.T.S. aims to provide high quality training for those dealing with dampness and timber infestations in buildings. Training is also a requirement of the COSHH Regulations (1999)

The Technicians/Foundation Course is specially suited to those requiring an introduction to dampness and timber infestation; it is especially suitable for Technicians.

The Foundation course will consist of three parts; the first part is an introduction to rising dampness, chemical damp-proofing, installation and performance of different systems, replastering and performance of replastering systems. The second part deals with the control of rots in buildings and the control of woodworm, materials and methods. Finally, a section is included on Health & Safety for the Technician.

The courses are run by **Independent Parties** and not related to specific manufacturers materials, etc. A certificate will be provided for those completing the course.

The courses will be held at Safeguard Europe Ltd, Redkilyn Close, Redkilyn Way, Horsham, West Sussex, RH13 5QL meeting at 9am for 9.30 start.

Course fees:*

1 day Technician Training Course
