

# 150mm (6 inch) Humidistat Air Vent

**For use in combating condensation problems.**

## Description

The 150mm Humidistat Air Vent is specifically designed to extract damp air from kitchens and larger bedrooms. The Humidistat sensor turns the fan on automatically when the relative humidity (dampness) of the air reaches a level that could cause condensation problems.

## Main Features

- Humidistat Sensor Operates Fan Automatically
- Quiet, Powerful Performance
- Thermally Protected Motor
- Automatic Shutters – prevent heat loss when fan is switched off.
- Easy to Fit and Clean
- Complies with UK Building Regulations (F1-1995)
- 2 Year Guarantee

## **Siting/Fitting/Ducting**

Full details are supplied with fan.

## **Technical Specification**

**Weight** – 2.4Kg

**Electrical Data** – 220-240 Volt 1PH, 50Hz, Consumption 35 Watts

**Sound Levels** – 57 dB[A] Max.

**Standards** – BS848 Part 1: 1980, BS3456 Part 102.342: 1988

**Operating Temperature** – Max. Ambient 50°C.

**Extract Performance** – 60 l/sec, 260m<sup>3</sup>/hr

**Estimated Running Cost** - £4.99 per year. Based on fan running 6 hours per day at electricity cost of 6.51 pence per Kw/h (Seeboard Band B price at 06/09/99).
